

Home

Simply Solutions was created to make simple information technology available for small business and organisations. Many small business and organisations are focused on the business they run, and do not have the time to explore how information technology could assist with getting their story out.

Many small business are uncertain about how to establish a web presence for their business, or how this web presence can benefit their business / organisation. Simply solutions makes use of an inexpensive content management system to provide simple and effective web based solutions, rapidly and inexpensively.

Sometimes small business are aware of waste in their business processes, but don't know how to go about using technology to move to lean processes. Simplysolutions can provide [project](#) ^[1]management, and [Information](#) ^[2]management assessments that focus on removing waste from your processes.

To see more about the web development and hosting services you can check out our [web sites](#) ^[3] page.

Please contact us so we can work with you to explore your vision for developing information technology within your business. You can find out how to contact us [here](#) ^[4].
